

# Keep your classroom safe from lead

How do you know if lead is in the water?

How does lead get into drinking water?

If you are unable to answer these questions and are interested in learning more on how to keep your classroom safe, learn more at [Florida's Voluntary Lead Testing Program for Schools and Childcare Facilities](#).

This grant-funded program allows all Florida licensed childcare facilities, public, charter, and tribal schools to receive educational resources to learn more about the dangers of lead among children at no cost.

Attached [HERE](#) is a brief pre-recorded presentation that discusses how lead gets into drinking water and information about the program. The following items below are some of the benefits of the program that are covered at no cost to the participants:

- On-site drinking water sample collection or shipment of a

sample kit.

- Analysis of samples at a certified laboratory.
- Educational materials on the health effects of lead
- in drinking water, methods to reduce lead exposure,
- and responding to elevated results.

**Learn More and Be Safe!**
